OOB AUTOMATION
Just one Touch for **Everything**

What if you don't have to get up every morning
to **close the curtains?**

What if you don't need to climb 2 floors just to
switch off the fan that the kids left on?

What if you don't need to get out of bed
to **switch on the geyser?**

What if your home automatically senses a
Gas leakage and takes the call for action?

What if your mobile can switch off the
AC which you kept on and left home?

We are here to remove all these ifs and buts...

We are OOB AUTOMATION!

OOB i.e. Out of Box Automation is an entity offering you a life free from the need to approach a BOX which you call a 'switch board' to operate anything at your home. Yes, with OOB's smart automation solutions, you can operate the switches from anywhere, anytime!

OOB AUTOMATION
"Just one Touch for **Everything**"

Live Smart with OOB!

You have always dreamt of a cozy, comfy life filled with convenience and luxury! All your smart gadgets, modern home appliances, stylish cars and lavish trips are the classiest examples of your rapidly changing preferences and enhanced aspirations!

So here we present something really inessential and conducive to pleasure and comfort – 'Smart Home Automation Solutions'!

Now if you wonder what is a Smart Home... Here is the answer! Smart homes are more functional, more controlled, more secured and more energy efficient! Our home automation technology allows most of your household activities to be controlled remotely. Be it your fan, light, AC, TV, geyser, door lock, curtains, garden sprinkler or water tank, OOB makes sure that you can control everything with just one touch!

Opt for the change

It's time to convert your old switch board to OOB Automation's stylish and sleek touch panel board. No extra civil work, no wiring, no any CAT6... Just a little change and the complete control of your home will be at your fingertips. These touch panels are not only attractive and eye-catching but also cost effective. You can also control your entire home through your smart phone or tablet with the help of our Smart Home App. So whether you live in a bungalow or an apartment, just convert it in to a Smart Home!

The smartphone screen displays the OOB Automation app interface under the 'HOME' tab. The screen is organized into a grid of 12 icons, each representing a different smart home function:

- Lighting
- AC
- Curtain
- Water Level
- Appliances
- TV
- Sprinkler
- Security
- Entertainment
- Gate
- Energy
- CCTV
- Music System
- Scheduler
- Door Lock

All in one App

You have been managing different remotes for your lights, fan, AC, TV, Set top box, projector, blue ray player, music system and many more appliances, but now there is just ONE solution for all. OOB brings all your remotes in just **one App**. Just install our App on your android or iphone and manage all your devices from anywhere, anytime. You can easily add or remove devices, set timer and scheduling and have child lock in the app.

This app also tracks and shows the energy consumption of each and every device. You can also do grouping of the appliances and operate them all at just one click. You can integrate IP cameras with the app to get a live feed. It will also give you instant notifications and timely alerts.
